Yash

BACK-END DEVELOPER

Yashwanth Venkata Sunkesula is our backend developer. From the entire group he gives off the main protagonist vibes. His hobbies are playing football, reading, and listening to music in his free time or while he is studying. He enjoys AP CSP because "We have a lot of fluidity with projects" and has an intermediate knowledge in coding (he knows python and java). After graduating High school he hopes of going to UCLA and WILL force Aryan, his sidekick, to come with him.
