Jayden: Started working on a new website because the other website looks ugly

December 19, 2023

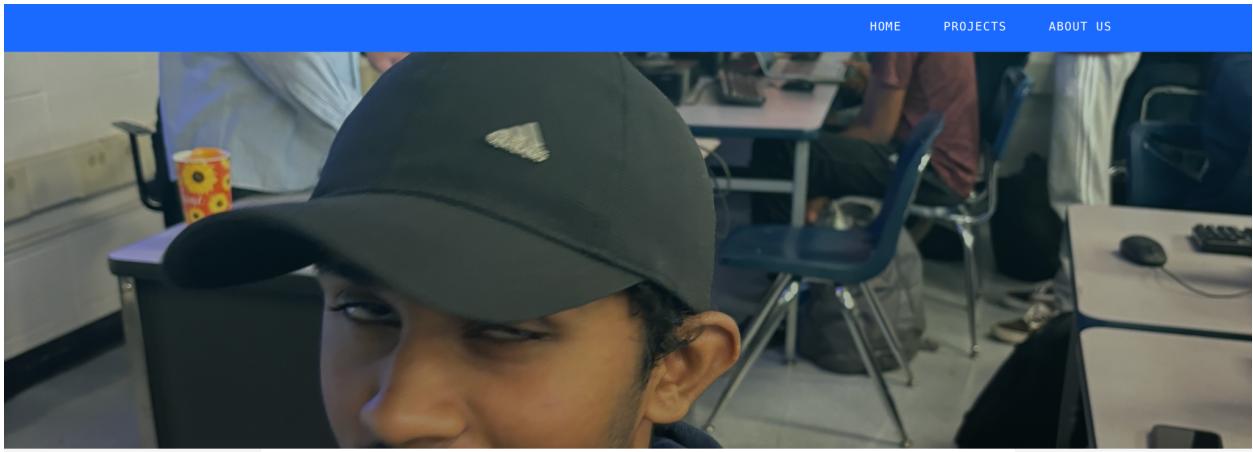

Jayden: Added profile pages for every member, added projects page, added contact page

(Home page)

(added nav bar)

HOME PROJECTS ABOUT US

Meet the Team

Click a picture to learn more about the person.

Yash

BACK-END DEVELOPER

Yashwanth Venkata Sunkesula is our backend developer. From the entire group he gives off the main protagonist vibes. His hobbies are playing football, reading, and listening to music in his free time or while he is studying. He enjoys AP CSP because "We have a lot of fluidity with projects" and has an intermediate knowledge in coding (he knows python and java). After graduating High school he hopes of going to UCLA and WILL force Aryan, his sidekick, to come with him.

(individual pages)

PROJECT 1: WEBSITE
Documentation

(projects page)

Member contributions:

Jayden: made the home page, about me page, nav bar, entire website basically

Yash: backend

Ishmael: helped occasionally with tech issues

Aaryan: designed the website (a little)

Nolan: Content specialist (sat around)
